

What is ecoRosin™?

ecoRosin is a new line of premium rosins, proudly innovated, designed and created in Australia by Leatherwood Bespoke Rosin. ecoRosin strives to leave a zero footprint on our planet whilst offering string players premium rosin recipes for colourful music making. ecoRosin uses natural, plant based ingredients and resins, including organic waxes and hemp. ecoRosin uses no animal products and is 100% Vegan. ecoRosin is biodegradable, will leave no waste, and estimated CO2e emissions are offset through investment in renewable energy projects.

ecoRosin™ for Violin, Viola, Cello

SCS certified recycled container to protect your rosin

Plant-based resins, organic oils and waxes

Carbon emissions offset

Vegan

Biodegradable

The ecoRosin recipes offer a clean and precise bite on the string, with a resonant and open sound. A low to medium traction allows for a generous warmth in sonorous playing. The strength of bite on the string is varied in each recipe to suit the Violin, Viola or Cello.

The health of our world is in rapid decline.
The polluting impact of industry and the relentless
use of resources and accumulation of waste is
choking our precious Earth.

At Leatherwood Bespoke Rosin, we have always been
committed to using sustainably-sourced materials
and ingredients in our range of super-premium rosins.
Now, we have embarked on our journey of examining
our overall impact on the Earth. We are taking steps
to become a certified Australian carbon neutral
company and completely offset our carbon footprint.
While we can't solve all of the world's environmental
challenges, we can certainly play our part.

ecoRosin is an affordable rosin which enhances
your music making. By using ecoRosin, you too are
joining our odyssey in regenerating the Earth.
